

The PMG 5 machine has been especially designed for forming and wrapping family size bricks up to 2000 g. Thanks to the modern design of the dosing unit, the machine can fill a wide range of portions utilising a single-cell construction with mechanical drives and servo technology. The machine design also allows for short changeover times for different portions, brick shapes & sizes.

The PMG5 machine is made from stainless steel and anodised aluminium.

To improve the effectiveness of the production process the working table is equipped with a fill lift. While filling, instead of moving the filling nozzle up and down, the seats are lifted with the packaging material up and under the filling nozzle.

Stations on the machine

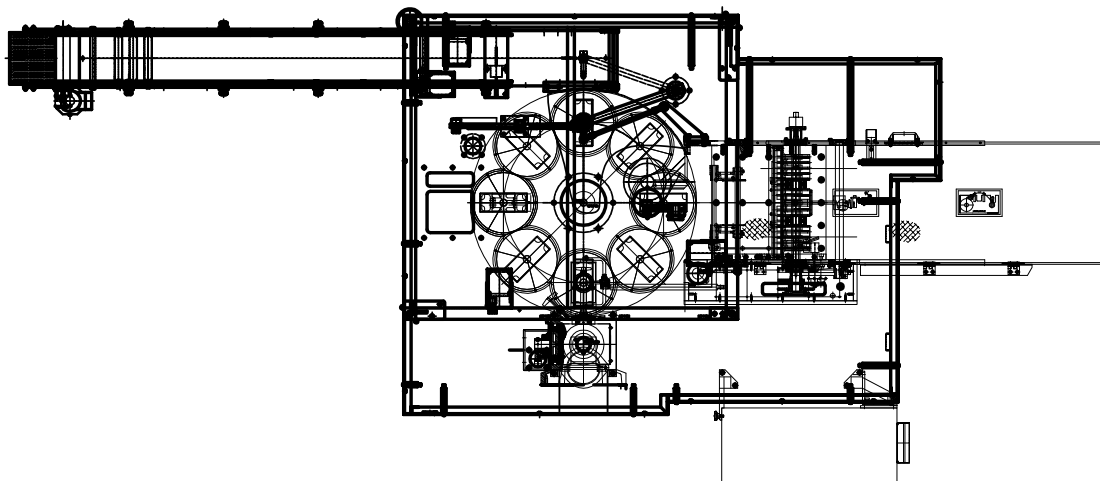

PMG 5 series
brick forming & wrapping machines

Technical specification

· Output (depending on the product and packaging material)	40 - 70 bricks/min. Up to 70 bricks/min. for 500 g bricks Up to 60 bricks/min. for 1000 g bricks Up to 40 bricks/min. for 2000 g bricks
· Portion volume	200 - 2000 g
· Brick shape	Rectangular /Oval (cylinder-like)
· Brick dimensions	
- Length	100 – 240 mm
- Width	40 – 100 mm
- Height	40 – 100 mm
· Packaging material	Aluminium foil laminates, parchment paper, foils based on natural minerals
· PLC system	Siemens S7-300
· Electricity	3 x 400V + N + E, 50 Hz
· Power consumption	approx. 10 kW
· Air consumption	approx. 5 l/min. (0,3 m ³ /h)
