

ENGINEERING OUR FUTURE

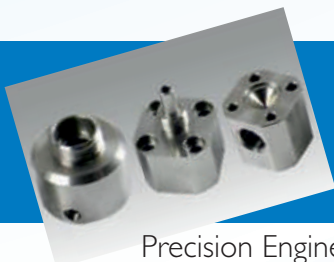

TREPKO UK is pleased to announce that the factory extension is now open. Completed on the 1st December, 2014, the 800 square metre extension located on the side of the existing assembly hall will be utilised as a dedicated machining centre for parts manufacturing.

CNC Machine

CAD Software

Precision Engineering

Due to substantial growth across the TREPKO Group, the UK site has invested in its production infrastructure to meet the growing demand for quality engineered TREPKO equipment.

In order to fulfill its expansion programme, TREPKO UK have also acquired a local company, KDR Engineering.

KDR Engineering specialise in the production of precision machined components for UK and European manufacturing Industries.

Comprising of a modern equipped machine shop they produce one-off items and high quantity components using the latest CAD software and CNC equipment.

With over 25 years experience, Kevin Reynolds, former Director of KDR

Engineering will oversee the running of the new machining centre and its 9 members of staff.

Kevin says "The acquisition of KDR Engineering creates great opportunities. Our experience of manufacturing precision components for the food and beverage industry will, I am sure, be a great asset to the TREPKO Group, along with our ability to batch manufacture".

By the end of January 2015, KDR Engineering will be fully integrated and operational within TREPKO UK. The new machining centre will now have in excess of 30 production machines at its disposal to ensure that TREPKO continues to meet its customer's expectations for quality components at competitive prices.
